

DEKTON™ COUNTERTOPS

The high resistance to UV rays Dekton surfaces have make the design of outdoor countertops possible, enabling their colour and texture to last over time. With your Dekton outdoor kitchen, you'll enjoy meals, parties and any outdoor event with friends and family, without losing the functionality and aesthetics of an indoor space.

EDORA

Warm gray, adaptable to both the classic and avant-garde styles. This surface creates minimalist and neutral environments where playing with other tones becomes simple.

FOSSIL

There is nothing so natural as the veins and spots that are drawn on this material on a darkened gray background. They give it an aged and old look typical of fossilized pieces.

NILIUM

Dekton Niliium is the minimalist element of the Industrial series. Inspired by a silver metal, Dekton Niliium offers a subtle cocktail of white and grey shades. The delicate appearance of warm colours represents the beginning of the oxidation process of a material.

OPERA

Inspired by the current desire for marble interiors, Opera takes inspiration from elegant Italian Carrara marble and offers a new soft touch which is the new Dekton Velvet Texture finish. Simple, light grey veining adds depth and interest to the creamy white surface for a classic understated finish which offers a sensational velvety soft touch.

PORTUM

Inspired by Portobello natural Stone, Portum, with Velvet finishes, search the perfection in tone, structure and background. The beauty of its grayish veins with sculptural pattern over a whitish base with caring watermarks. A trendy design full of character and elegance.

VERA

Its veining and its cement background make Vera a fusion between the natural and the industrial, highlighting the most elegant elements of both. Its greyish background colour combined with its pale veining break with the aesthetics of conventional colours.
